

I-ON Digital Corp. Discusses Acquisition of Orebits Corp. Parent Company and 2023 Chainlink Spring Hackathon Win with The Stock Day Podcast

Phoenix, Arizona--(Newsfile Corp. - July 11, 2023) - The Stock Day Podcast welcomed I-ON Digital Corp. (OTC Pink: IONI) ("the Company"), a leader in the development of next-generation gold, precious metal, and illiquid asset digitization and securitization ecosystems that allow for institutional-grade trading and financial hypothecation on a secure, lightening fast hybrid blockchain infrastructure. CEO of the Company, Carlos Montoya, joined Stock Day host Kevin Davis.

Davis began the interview by asking about the Company's background and current projects. "I-ON Digital is a digital solutions company developing cutting edge technology platforms for digital assets, primarily in the financial services and health care sectors," shared Montoya.

"How would you characterize the Company's progress to date towards its goals to develop a next-generation asset digitization and securitization ecosystem, specifically targeting the monetization of in situ gold?" asked Davis. "We can now demonstrate the existence of the asset, as well as the ability to move the asset at an institutional level based on state-of-the-art technology," said Montoya before elaborating on the Company's recent announcement detailing their agreement to acquire the parent company to Orebits Corp.

"What is the strategy associated with the legacy format?" asked Davis. Montoya shared his vision for the next-generation of banking, which involves creating institutional-level ecosystems with transparent assets. "With the speed and efficiency of blockchain it allows us to utilize a significant amount of data and move it with efficiency, including proof of reserves and proof of work," said Montoya. "We have some of those early legacy ambitions," he added. "Our goal was to solve for pillars including, full transparency as a security and independent custody for reporting."

"We look to completing the Orebits Corp. acquisition to basically have all of that legacy in our quiver," continued Montoya. "You could argue that the transaction also comes with our service bureau platform, MCM, or our banking services platform, Tall Ship Partners," he explained. "All of those companies are ultimately being merged in and licensed to I-On Digital."

The conversations then turned to the Company's status as one of the 2023 Chainlink Spring Hackathon winners for the Space and Time Data category. "This gives us validation at the top-level from the Web3 and technology community that our approach is considered to be stellar," said Montoya. "When it comes down to it, data integrity is critical in any financial asset."

To close the interview, Montoya encouraged listeners and shareholders to keep up-to-date on the Company's updates and current projects as they continue to revolutionize the digital payments industry.
